Work Experiences

TikTok Pte Ltd

Data Scientist, Trust & Safety

Jul 2024 - Present

- Developed NLP, LLM, and multimodal clustering solutions to make emerging risk identification faster, sharper, and more actionable for enforcement teams.
- Built cross-team risk frameworks and success metrics to quantify detection quality, containment effectiveness, and operational efficiency for senior leadership.
- Launched LLM-driven solutions for ad hoc business emergencies, reducing manual triage and accelerating response to business-critical risk events.
- Designed trust-focused metrics connecting external partner confidence, platform risk, and business performance to strengthen operational accountability.

Data Analyst, Trust & Safety

Sep 2022 - Jun 2024

- Appointed Program Lead, driving data analytics initiatives and optimizing project intake and workflows with cross-functional teams.
- Founding member of the Core Analysis team, developed root cause analysis methodologies, data frameworks, and cross-functional workflows to scale analytical impact.
- Led and conducted RCA at a department-wide level to identify systemic issues and presented findings to senior leadership to influence and drive remediation efforts.

Lazada South East Asia Pte Ltd (Alibaba Global)

Senior Associate, Regional Data & Business Intelligence

Dec 2021 - Aug 2022

- Leveraged data (eg. A/B) to identify business opportunities, risks and makes targeted recommendations for commercial strategy and growth.
- Responsible for identifying business opportunities through platform traffic and category demand analysis.
- Defined key metrics and develop analysis framework for two major categories (Digital Goods & General Merchandise) of platform business.

Air Liquide Singapore Pte Ltd

Senior Associate, Data Analytics & System

Jul 2019 - Nov 2021

- Collaborated with multi-disciplinary teams to develop analytical solutions and perform quantitative analysis (using R, SQL, and Power BI) to support operational optimization and troubleshooting.
- Led the development of BI reports and data models to deliver key metrics and actionable insights for strategic decision-making.
- Built predictive models using OT software to improve product quality, process stability, business performance, and supply chain continuity.

Senior Associate, Continuous Improvement & Product Quality

Aug 2016 - Jun 2019

- Led Six Sigma Green Belt projects with statistical tools and data analytics leading to process improvement with soft and hard savings.
- Spearheaded risk and gap assessment analysis in critical batch processes for identification of process control opportunities.

Management Associate, Operations

Jul 2015 - Jul 2016

- Managed operations, safety and team performance to maximize efficiencies and optimization.
- Established GMP-compliant computer system quality framework across 3 sites in line with PIC/S Annex 11.
